DETAILED ACTION

Double Patenting

Claims 2-4 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 2 of U.S. Patent No. 6,224,199.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent claims including the entire claimed feature except for specifically claiming the discharge and charging steps in certain order and through only the same port, and through a defined port being engageable with an ink jet recorder.

However, since the patent claims are broader with respect to the aforementioned features, the patent claims encompass the entire claimed feature and therefore not patentably distinct from each other.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

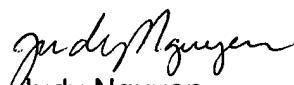

Art Unit: 2861

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
